To:

The issue with the CHEEC calculation is a difference of opinion between Bill and me over how to make the adjustment to continuous exposure (24/7) from the work schedules. We are working with EPA scientists in RTP to resolve the issue. I put it on the agenda as a place holder and to provide some information on why we can't proceed directly to calculate CHEEC until the issue is resolved. There is nothing that UC needs to do here.

Bob, Thanks. Linda will be on the call but Carol will not. What is the issue with the CHEEC calculation?

Best regards,

Tim
